

Hello , you are the colleague we are looking for ?

Junior BI consultant

The Axis CPM (Corporate Performance Management) division is well known in the Benelux Market and France and highly respected for its in-depth knowledge of FP&A, financial consolidation, and management reporting.

Axis is implementing Modelling, Analytics & AI technology such as “IBM Planning Analytics & Watson, IBM Cognos Controller, IBM Analytics” and Jedox.

Axis has created vertical standard FP&A applications for market segments as Hospitals, Municipalities and Industry specific which can be activated in very short timelines.

Axis develops and implements also specific compliance software as IFRS 16, IFRS 17 and ESG reporting.

Axis helps customers in Planning, Budgeting, Forecasting, Analysis and Reporting since more then 30 years and is looking for new colleagues to strengthen their team in a growing market.

Your role

We are looking for a junior BI Consultant who can help in developing visualizations and analysis reports for financial FP&A and Management reporting processes.

You will contribute to the identification of End User BI business requirements for business and finance processes such as “long-range financial plan, annual financial budget, periodic forecast, management reporting and analysis” ao. You will prototype the reports and visualizations and assist to make all reports operational.

You will run spot checks on BI developments. You will collaborate closely other team members as the UI design and modeling development team. You will document your work and share with colleagues for support and maintenance.

You will be surrounded by experienced colleagues that will collaborate with you to work on CPM projects at the customers’ premises or at our offices. You will get the opportunity to get acquainted with various businesses and industries combining web development and CPM process knowledge.

Hello , you are the colleague we are looking for ?

Your Responsibilities

- Develop BI reports by making use of leading BI / CPM software IBM Analytics ,IBM PA and Jedox.
- Test reports and optimize in visualization and performance
- Keep up to date with latest versions of the leading software IBM Analytics , IBM PA and Jedox.
- Conduct knowledge transfer towards our clients and training of end-users, including sharing best practices
- Support, Coach and Assist customers in usage and change of the BIR reports and visualizations
- Inform and share knowledge with functional team members

Required Skills

In our new colleague, we seek for someone who is familiar with BI , visualization techniques and reporting business processes or has great interest in learning in this field of expertise. More specific we describe our ideal candidate as following:

- You are following a university degree, or you have recently graduated as a master or bachelor's in information management, Application Development, Web Design, Business and Information Systems Engineering or comparable.
- Able to work independently and deliver against deadlines.
- Creative, pro-active, eager to learn, self-develop and out of the box thinking
- Excellent communication and writing skills in English and in French or Dutch.
- Customer centric
- Work in a secure, thorough, efficient, and comprehensive manner.
- Assets are:
 - Experience working with data and data warehousing business solutions
 - Knowledge of Data warehousing concepts
 - Thorough understanding of Cognos Reporting and Dashboard
 - Turning data into analytics
 - Create professional reports that provide critical insights into what is happening in customer business
 - Build stunning visualizations that unlock trends, patterns, and outliers
 - Understanding multi-dimensional data, cubes, subsets, dimensions

Hello , you are the colleague we are looking for ?

Our commitment to you

Besides a comprehensive compensation package that is beyond industry standards, working at Aaxis Group will allow you to develop and extend your knowledge and network in application development related to Corporate Performance Management, Data Management and BI, Advanced Analytics and Big Data. You will find yourself surrounded by young and senior colleagues in the Benelux CPM & BI landscape. You will get the opportunity to enrich your competences in CPM application development in different vertical segments as hospitals, municipalities, and industry specific as energy, production and construction which will allow you to use your skills and knowledge to your full extent. You will start with a formal training and can work on internal and external projects guided by senior colleagues, which will provide you the opportunity to obtain new heights in your personal and professional development.

We offer a balance of office and home working in a fun-workplace where team play is key. The number of days in the office is subordinated to engagement, involvement, pro-activity, and trust. We are environmental conscience and act as such in offering transport and facilities. We enjoy working as well as fun making. We are pragmatic, transparent and sales of our own IP solutions in CPM is expanding rapidly .
