

Hello , you are the colleague we are looking for ?

Junior CPM consultant – Modelling

The Axis CPM (Corporate Performance Management) division is well known in the Benelux Market and France and highly respected for its in-depth knowledge of FP&A, financial consolidation, and management reporting.

Axis is implementing Modelling, Analytics & AI technology such as “IBM Planning Analytics & Watson, IBM Cognos Controller, IBM Analytics” and Jedox.

Axis has created vertical standard FP&A applications for market segments as Hospitals, Municipalities and Industry specific which can be activated in very short timelines.

Axis develops and implements also specific compliance software as IFRS 16, IFRS 17 and ESG reporting.

Axis helps customers in Planning, Budgeting, Forecasting, Analysis and Reporting since more then 30 years and is looking for new colleagues to strengthen their team in a growing market.

Your role

We are looking for a Junior CPM Consultant who can help in setting-up analytical models for applications in financial budgeting, forecasting, predictions, analysis and reporting .

You will contribute to the identification of End User business requirements for business and finance processes contributing in creation of a long range financial plan, annual financial budget, periodic forecast, management reporting and analysis. Based on agreed requirements you make first prototyping and roll-out in an agile manner the full model in the customers organizations. You will test the models developed by colleagues and provide enriching feedback to the optimize in performance. You will collaborate closely with the UI design development to optimize the user experience. You will document your work and share with colleagues for support and maintenance.

You will be surrounded by experienced colleagues that will collaborate with you to work on CPM projects at the customers’ premises or at our offices. You will get the opportunity to get acquainted with various businesses and industries combining web development and CPM process knowledge.

Hello , you are the colleague we are looking for ?

Your Responsibilities

- Assist in defining an optimal analytical model (cubes) in leading CPM software and solutions within a team of CPM business consultants & modelers
- Assist in translating the customers' business requirements into a prototype
- Develop and test model developments
- Document development & tests performed
- Conduct knowledge transfer towards our clients and training of end-users, including sharing best practices
- Support, Coach and Assist customers in usage and change of the analytical models
- Keep up to date with latest trends and functionalities in new releases of the leading CPM software
- Inform and share knowledge with functional team members
- Perform configuration/customization related activities to answer user requirements in the domain of planning, budgeting, forecasting, analysis, and reporting

Required Skills

In our new colleague, we seek for someone who has great interest in learning in the field of expertise - modelling business processes in multidimensional database technology. More specific we describe our ideal candidate as following:

- You are following a university degree, or you have recently graduated as a master or bachelor's in information management, Application Development, Web Design, Business and Information Systems Engineering comparable.
